Large Timber Outbuildings

Whether you are looking to store a tractor, hay or classic car, NFF can build a barn to your exact requirements. We can manufacture and install static barns to sit on a concrete base or portable barns on galvanised skids to move around your land.

Project Managing

Our timber buildings team will personally manage your project from start to finish. We are a friendly and helpful team that prides itself on years of experience & excellent customer service.

Design

We offer a full specialist bespoke service to assist with your project for planning permission, groundworks, CAD Drawings and advice for the design and layout.

Manufacturing

All our buildings are manufactured using pressure treated timber by our experienced workshop team. Our team have many years of experience in constructing all sorts of timber buildings, from garden offices to large barns for commercial use.

All of our timber buildings are carefully constructed at our workshop in Horam and built to order with care and attention to detail.

Installation

Our installation team are fully qualified, honest, reliable professionals with knowledge and expertise in timber building construction. Our installers work quickly & efficiently and take great pride in their work.

We have a broad portfolio of projects including hay barns, equestrian American barns, tractor storage, machinery store and garage barns for vehicles.
